Summary

Product Designer specializing in design systems and design-to-code workflows, with broader experience across end-to-end product design. I audit and rebuild token architecture, close gaps between Figma design systems and production code, and design workflows for regulated, clinical products. I own design across research, UI, prototyping, and cross-functional handoff.

Skills

Design Systems | Design Tokens | Component Libraries | Figma | Design-to-Code Workflows | AI-Assisted Prototyping | HTML/CSS | UX/UI Design | Wireframing & Prototyping | User Research | Cross-Functional Collaboration | Healthcare & Regulated Product Design | Accessibility

Experience

Product Designer – Elevate Health Technologies

May 2025 – Present

Brooklyn, NY (Remote)

- Lead design systems work for OnePulse Connect (OPC), a medically integrated dispensing platform for specialty pharmacy, and design complex clinical workflows within the product
- Audited the design system's token architecture and rebuilt it into a three-layer structure (brand, alias, mapped), fixing drift between the Figma design system and its React implementation
- Built a Figma-to-code workflow using AI-assisted tooling to prototype directly in production-ready components instead of static mockups
- Designed clinical workflows with product and clinical stakeholders, including a pre-infusion patient assessment flow and prescription document-linking patterns
- Shipped design system fixes directly into the product's React codebase – color tokens, spacing, component drift – turning the system into an enforced source of truth

Product Designer – Elevance Health / BioPlus

Jun 2023 – Apr 2025

Brooklyn, NY (Remote)

- Owned end-to-end product design across a specialty pharmacy dispensing platform through its acquisition by Elevance Health
- Reconciled the platform's design and workflows with Elevance Health's existing backend and database systems, weighing technical constraints against usability
- Aligned visual and brand patterns with Elevance Health's broader design standards
- Shifted my design process to match a larger organization's design and review structure

UX/UI Designer – BioPlus Specialty Pharmacy

Sep 2022 – Jun 2023

Brooklyn, NY (Remote)

- Designed a specialty pharmacy dispensing platform end to end, spanning clinical staff-facing modules and a customer-facing product
- Designed core workflow modules, including Benefits Investigation and clinical Assessments, working directly with pharmacy and clinical stakeholders
- Designed MyBioPlus, the platform's customer-facing counterpart, alongside internal dispensing tools
- Built an early design system for the platform and established shared patterns as it scaled
- Owned the full design process: research, flows, UI, and handoff, with little dedicated design system infrastructure

Early Experience

UX Designer — Aperture (Freelance): search redesign, desktop and mobile	Jun - Sep 2022
UX/UI Designer — Radish Health (Freelance): health checklist feature	Jan - Aug 2022
UX Design Intern — Arnie: user flows and low-fidelity wireframes	Nov 2021 - Feb 2022

Education

Master of Fine Arts (MFA), Photography School of the Art Institute of Chicago	2017 - 2019
Bachelor of Design, 1st Class Honors, Photography Massey University, Te Kunenga ki Pūrehuroa	2011 - 2014

Certifications

Design Systems Certificate — Memorisely	May 2024 - Jul 2024
UX Design Career Track, Certification — Springboard	2020 - 2021
